Department of Biology

RECEIVED NOV 27 2018

Sessional Appointment – Winter 2019

The Department of Biology invites applications from qualified individuals who are interested in teaching the following course:

03-55-460-01 Molecular Biotechnology	Introduction to the techniques and applications of recombinant DNA technology and genetic engineering. Topics include the generation of transgenic organisms (microbes, plants, and animals) and their impact on agriculture and medicine. The social ramifications of these technologies will be discussed. (Prerequisites: 55-350 or 55-353.) (3 lecture hours a week.)
Term	January 1, 2019 – April 30, 2019
Qualifications	The successful candidate must hold a Master's degree by the date of appointment, a Ph.D. degree is preferred

For additional information, contact the Department of Biology at (519) 253-3000 ext. 2696

Applications are to be submitted on or before **Thursday September 27th, 2018 by 4:00 pm**

As required by the Collective Agreement, the Department of Biology is hereby calling for applications from members of the Faculty Association who are suitably qualified and interested in teaching the above-mentioned course for the Winter 2019 semester.

Applicants who have not previously taught courses by the Biology Department are asked to submit a full C.V. Please email your C.V. etc. to biosci@uwindsor.ca

Applicants from outside the University of Windsor will be expected to provide three letters of reference. The appointment to this position is subject to final budgetary approval.

Dr. Dennis Higgs, Department Head
Department of Biology
