SESSIONAL APPOINTMENTS – Fall 2019

Master of Medical Biotechnology Program

The Department of Chemistry and Biochemistry intends to offer the following graduate courses during the Fall 2019 semester which might not be staffed by full-time faculty members as part of their normal teaching load. In accordance with section 54-07 of the 2017-2021 Collective Agreement, the department invites applications from suitably qualified individuals who are interested in teaching the following courses.

New Applications are required to include the following materials:

- Letter of application, including the course(s) applied for and a statement of citizenship/immigration status
- Brief statement that explains how the applicant's teaching and research background prepares her/him to teach the particular course they are applying for.
- A detailed and current curriculum vitae
- A statement of teaching philosophy and interests (maximum of 250 words)
- Three (3) letters of reference
- Evidence of qualifications (i.e. transcripts, certification of degrees, courses taken, dissertation and thesis topic, etc.)
- Indications of successful teaching (i.e. official SETs or equivalent for all courses taught)
- A teaching dossier
- The successful candidate will have a PhD in Biochemistry or related natural science, with university teaching experience at the graduate level in Biochemistry.

All other candidates who have previously taught at the University of Windsor, Department of Chemistry and Biochemistry are strongly encouraged to provide an updated curriculum vitae and must provide one if it has been 3 years since they have taught in the department. Candidates should also provide a statement that explains how her/his teaching, research and professional experience prepares her/him to teach the particular course.

Biochemistry & Cell Biology – Lipids & Membranes BIOC-8720 (formerly 03-59-675)	This course focuses on the biochemistry and cell biology of lipids and their role in cellular signaling, with a particular emphasis on the experimental basis of current knowledge. Topics covered include lipid biochemistry, membrane biophysics, the biochemistry and metabolism of small molecules such as steroids and leukotrienes, and an integrative assessment of the role of lipids and membranes in cellular processes such as protein trafficking and intracellular signaling. (3 lecture hours per week.) (Enrolment restricted to MMB students.)
---	--

Subject to budgetary approval and sufficient enrolment

Submit complete applications to Dr. James Gauld by e-mail to chembiohead@uwindsor.ca by May 21, 2019

The University of Windsor is committed to equity in its academic policies, practices, and programs; supports diversity in its teaching, learning, and work environments; and ensures that applications from members of traditionally marginalized groups are seriously considered under its employment equity policy. Those who would contribute to the further diversification of our faculty and its scholarship include, but are not limited to, women, Aboriginal peoples, persons with disabilities, members of visible minorities and members of sexual minority groups.

Only those successful will be contacted.

Dr. James Gauld
Acting Head, Chemistry and Biochemistry
